

# IS YOUR WHEY PROTEIN REALLY 100% WHEY?

Many of the major protein brands in the industry label their products with the word Whey, 100% Whey, or 100% Isolate Whey protein, but when you read below the ingredients section it states another reality. how can you see the truth, by the section below the supplement fact panel, called other ingredients. That section will state the other ingredients that are used in the formula. if it states CONTAINS MILK SOY AND WHEAT INGREDIENTS, it is no longer a pure Whey protein formula, but if it states it only CONTAINS MILK INGREDIENTS it is a pure WHEY FORMULA, because Whey only comes from MILK.

You as a consumer do not know how much soy, wheat, egg verses whey is in the formula, today. It is time to read the label and to become an intelligent consumer. Whey has the highest biological value at 170. Once it is mixed with soy, wheat, egg the biological value is lowered to around 85, 90. Research has shown that Whey increments the immune system and repairs muscle tissue rapidly, but if the formula is mixed with other ingredients it lessens and slows down recovery time from your workout.

Genetics Tech 100% Whey Gen only CONTAINS MILK INGREDIENTS making it the only 100% Whey protein in the market. We have to be true to our label because we are set to a higher standard because of our KOSHER Certifications, which goes far beyond governmental regulations and, because you deserve the best!

## The Most Scientifically Advanced, Sustained Release, Protein Supplement:

Genetics Tech Nutrition® has developed an advanced blend of protein in 100% WHEY GEN™ that is meant for the serious athlete. Each serving of 100% WHEY GEN™ ensures your body receives the protein needed for protein synthesis and lean hard muscle. Our 100% WHEY GEN™ is processed using low temperatures which helps protect the protein from the denaturing potential of heat. These low-temperatures and state-of-the-art cross flow microfiltration methods, help ensure you are getting the best possible protein!

## Time-Released Protein and Maximum Absorption:

The use of both fast and slow digesting protein sources in 100% WHEY GEN™, from Whey Isolate and Micellar Casein, further enhance the effectiveness of this protein supplement. This dual protein blend creates a "timed-released" mechanism which feeds your muscles for hours! We have also formulated this protein powder with glutamine peptides, PRO GEN™ digestive enzymes and Hydrolyzed Whey to ensure maximum absorption.
